Cubebs extractee by displacement by liquor obtained from Juniper Berries, containing very little sugar, a small properties of a pirit, and more palitable than any now in \$25. The active properties are by this mode extracted.

Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that emits its fragrance, the action of a fame destroys this (its active principle), leaving a dark and glutinous decoction—line is the color of ingredients. The Buchu in my preparation predominutes the smallest quantity of the other ingredients are added, to prevent fermentation; sipen inspection, it will be found not to be a tincture, as made in Pharmacopæa, nor is it a yrup—and therefore can be used in cases where fever or inflammation exists. In this you have the knowledge of the ingred, this and the mode of preparation.
